## SWIMMING OF LARGER ANIMALS - PART II

Hydromechanical aspects of fish swimming (Invited General Lecture) J. N. Newman and T. Y. Wu	615
Lunate-tail swimming propulsion M. G. Chopra	635
Laminar boundary-layer development and transition of fish-shaped bodies of revolution Carl Gazley, Jr.	651
Hydrodynamic drag reduction due to fish slimes J. W. Hoyt	653
The swimming of slender fish-like bodies in waves R. Coene	673
Extraction of flow energy by fish and birds in a wavy stream Theodore Y. Wu and Allen T. Chwang	687
Some hydrodynamical aspects of fish schooling D. Weihs	703
Experimental studies of human swimming at the Netherlands Ship Model Basin J. D. van Manen and H. Rijken	719

## FLIGHT OF BIRDS AND INSECTS - PART I

Flapping flight and power in birds and insects, conventional and novel mechanisms (Invited General Lecture) Torkel Weis-Fogh	729
Hovering flight of the dragonfly <u>Aeschna</u> <u>junceae</u> L., kinematics and aerodynamics R. Ake Norberg	763
Non-steady-state aerodynamics of the flight of <u>Encarsia formosa</u> Charles P. Ellington	783
Aerodynamic forces and their calculation in insect flight W. Zarnack	797

## CONTENTS of VOLUME 2

### SPECIAL INVITED LECTURE

Aerodynamic aspects of animal flight Sir James Lighthill	423
---	-----

### SWIMMING OF LARGER ANIMALS - PART I

Muscular and energetic aspects of fish swimming (Invited General Lecture) Q. Bone	493
The response of fish to shearing surfaces in the water Richard Bainbridge	529
The forces resisting locomotion in bluefish A. B. DuBois, G. A. Cavagna and R. S. Fox	541
Speed, power, and drag measurements of dolphins and porpoises T. G. Lang	553
Efficiency of pectoral-fin propulsion of <u>Cymatogaster aggregata</u> P. W. Webb	573
Hydrodynamics of the body of <u>Dytiscus</u> <u>marginalis</u> (Dytiscidae, Coleoptera) W. Nachtigall and D. Bilo	585
Swimming energetics of the larval anchovy W. J. Vlymen	597
Swimming of planktonic <u>Cyclops</u> species (Copepoda, Crustacea): pattern, movements and their control J. Rudi Strickler	599

On the mechanics of flight of small insects Arnold M. Kuethe	803
Insect aerodynamics near hovering Leon Bennett	815
Air flow and the flight of a noctuid moth Martin A. C. Chance	829

## FLIGHT OF BIRDS AND INSECTS - PART II

Aerodynamics and energetics of vertebrate fliers (Invited General Lecture) V. A. Tucker	845
Hovering flight in the pied flycatcher ( <u>Ficedula hypoleuca</u> ) U. M. Norberg	869
Flight metabolism of flying foxes Roger E. Carpenter	883
On the efficiency increasing interaction of thrust producing lifting surfaces J. A. Sparenberg and A. K. Wiersma	891
A note on flapping flight with surging E. C. James	919
Bird aerodynamic experiments Edward F. Blick, Dennis Watson, Gary Belie and Humphrey Chu	939
The effect of span-wise variations in amplitude on the thrust-generating performance of a flapping thin wing E. O. Tuck	953
Soaring birds as "Maxwell demons" Ferdinand Hendriks	975
Ornithopter aerodynamic experiments A. George Bennett, Roger C. Obye, Paul M. Jeglum	985
