

HIGH PRESSURE AND X-RAY STUDIES OF LIQUID CRYSTALS

A Thesis Submitted to the
UNIVERSITY OF MYSORE
for the degree of

Doctor of Philosophy

By

V. N. RAJA

Liquid Crystals Laboratory
RAMAN RESEARCH INSTITUTE

BANGALORE-560 080, INDIA

JUNE 1988

DECLARATION

I hereby declare that the thesis was composed by me independently and that it has not formed the basis for the award of any Degree, Diploma, Associateship, Fellowship or other similar title.

V. N. RAJA

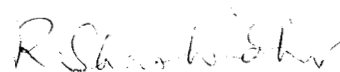

CERTIFIED

Professor S. Chandrasekhar
Raman Research Institute
BANGALORE 560 080

CERTIFICATE

I certify that this thesis has been composed by Mr. V. N. Raja, based on investigations carried out by him at the Liquid Crystal Laboratory, Raman Research Institute, under my supervision. The subject matter of this thesis has not previously formed the basis of the award of any degree, diploma, associateship, fellowship or other similar title.

Dr. R. Shashidhar
Liquid Crystal Laboratory
Raman Research Institute
BANGALORE 560080

ACKNOWLEDGEMENTS

The work presented in this thesis was conducted in the Liquid Crystal Laboratory, Raman Research Institute, Bangalore, under the guidance and supervision of Dr. R. Shashidhar. I am highly indebted to him for his stimulating interest and constant encouragement throughout this work.

I express my deep sense of gratitude to Prof. S. Chandrasekhar for his guidance and keen interest in my work.

I record my sincere thanks to Dr. B. R. Ratna for her active help and encouragement. Innumerable discussions with her are gratefully acknowledged.

My special thanks are due to Dr. S. Krishna Prasad for his constant help, in particular, in solving problems associated with computer interfacing, to Mr. S. Somasekhara and C. Nagabhushan for their cooperation during some of the experiments.

I am also thankful to Mr. V. Nagaraj, Mr. A. Mani, Mr. K. Subramanya, Mr. H. Subramonyam for their technical help, and Mr. S. Raghavachar for his help in the official matters.

My thanks are also due to Mr. A. Ratnakar and his staff in the Library, for their support and help.

Finally, I am very grateful to my parents, brothers and my sister who all have sacrificed their comforts for my sake and filled me with courage and confidence.

V. N. RAJA

C O N T E N T S

Chapter I	Introduction	1
Chapter II	Experimental Techniques	25
Chapter III	An Incommensurate Smectic A phase	53
Chapter IV	Strongly coupled incommensurate smectic A phase	84
Chapter V	A new alternative for the smectic A_1 -reentrant nematic - smectic A_d bicritical point	95
Chapter VI	Pressure studies of 4-n-alkoxy-phenyl-4'-(4"-nitrobenzoyloxy) benzoate homologous series : Pressure induced triply reentrant behaviour in a single component system	119
Chapter VII	Experimental studies on terminally non-polar materials	141
Chapter VIII	High pressure studies on discotic liquid crystals	150
Chapter IX	Phase transitions of nematic main-chain polymers under pressure	161
Chapter X	A thennotropic biaxial nematic liquid crystal	174
