

HIGH PRESSURE STUDIES OF LIQUID CRYSTALLINE TRANSITIONS

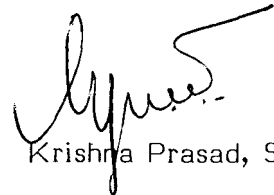

A Thesis Submitted to the
UNIVERSITY OF MYSORE
for the degree of
Doctor of Philosophy

By
S. KRISHNA PRASAD

Liquid Crystals Laboratory
RAMAN RESEARCH INSTITUTE
BANGALORE-560 080, INDIA
MAY 1985

DECLARATION

I hereby declare that the thesis was composed by me independently and that it has not formed the basis for the award of any Degree, Diploma, Associateship, Fellowship or other similar title.

CERTIFICATE

I certify that this thesis has been composed by Mr. S.Krishna Prasad, based on investigations carried out by him at the Liquid Crystals Laboratory, Raman Research Institute, under my supervision. The subject matter of this thesis has not previously formed the basis of the award of any degree, diploma, associateship, fellowship or other similar title.

Dr. R. Shashidhar

ACKNOWLEDGEMENTS

The work presented in this thesis was carried out in the Liquid Crystal Laboratory, Raman Research Institute, Bangalore, under the supervision of Dr. R.Shashidhar. I am deeply indebted to him for his stimulating guidance throughout the course of this work. Without his unfailing inspiration, guidance and help through the years, this work would never have been completed; working under him has been a rich and rewarding experience.

I express my deep sense of gratitude to Prof. S.Chandrasekhar for his invaluable advice, suggestions and keen interest in my work. I have a very special indebtedness for him for providing an opportunity to work in his group.

I would also like to express my sincere thanks to both Prof. S.Chandrasekhar and Dr. R.Shashidhar for the critical reading of the manuscript.

I am extremely thankful to Dr. B.R.Ratna for her keen interest in my experiments. I have been benefitted by her willingness at all times to discuss problems associated with the work.

My sincere thanks are due to Dr. G.Heppke and his Berlin Group for providing 'most of the compounds studied in this thesis. I also thank Dr. B.P.Gaber of the Naval Research Laboratory, USA, and Dr. V.Surendranath of Raman Research Institute for giving some liquid crystalline substances. My thanks are due to Mr. P.N.Ramachandra for purifying some of these.

It is a pleasure to thank Herr S.Pfeiffer of Technische Universitat, Berlin, for his collaboration during the period January-February 1983. My

thanks are due to Dr. N.V.Madhusudana, Dr. G.S.Ranganath, Dr. K.A.Suresh, Dr. B.K.Sadashiva, Dr. A.N.Kalkura and Mr. T.N.Ruckmongathan who helped me in many ways; Ms. R.Pratibha, Mr. V.A.Raghunathan, Ms. K.R.Sumathy, Mr. V.N.Raja, Mr. S.Somasekhar, Mr. C.Nagabhushan, Mr. Imthyaz and Mr. S.Ramesh for the good company and generous help they have provided through the course of this work. Special thanks are due to Mr. V.N.Raja for his help in proof-reading the typescript.

I owe my thanks to Mr. K.Vasudevan for his technical advice and his help in the design and fabrication of the high pressure optical cell and to Mr. V.Nagaraj for precise machining of the various components of the pressure cell.

I also thank Mr. K.T.Balakrishnan, Mr. K.Subramanya, Mr. H.Subramonyam for their technical assistance.

Special thanks are due to Mr. A.Ratnakar of the Library and his staff who have been most courteous in assisting to get hold of literature and providing photostat copies of the text and the drawings of this thesis.

I owe my thanks to Mr. D.L.Hegde who missed a good number of those lovely evenings to give beautiful typographic form to the thesis. I also profusely thank Mr. S.Raghavachar for his help in official matters.

I am grateful to the authorities of Raman Research Institute for providing a research fellowship during the tenure of this work.

Finally, I wish to thank my parents, my aunt and sisters for their encouragement, tolerance and sustained support through the years.
