

Open Day at Raman Research Institute today

The Hindu Bureau
BENGALURU

The annual National Science Day celebrations at the Raman Research Institute (RRI) would be held on Saturday to mark Sir C.V. Raman's Nobel Prize-winning discovery of the Raman Effect.

To inculcate scientific temper among schoolchildren, the Open Day will be organised by the RRI, with students and staff across the institute putting together engaging programmes featuring experiments, scientific demonstrations, and a

range of exciting activities.

The RRI said that the scientific display stalls would offer a glimpse into the institute's ongoing research across various groups and facilities, while also presenting key scientific concepts in interactive and accessible ways.

Students from government and private schools in Bengaluru and its surrounding areas are welcome to participate in the celebration. Admission to the general public is available. The institute added that multiple schools from in and around Bengaluru with a combined total of

over 1,000 students have already confirmed their attendance this year, and visitors will be able to see scientific experiments across multiple stalls. The visitors can also interact with the RRI research scholars and engineers and take part in hands-on experiments.

Competitions were also being conducted as part of the celebrations, a fun way to explore science through quizzes, photography, and creative costumes.

The event will be conducted in two sessions from 10 a.m. to 1 p.m. and from 2 p.m. to 4 p.m.
